- Participant: Smart India Hackathon (2024, 2025)
- Organizer: Powerlifting & Arm Wrestling Competition (2025)

LANGUAGES

- English
- Hindi

PROFILE

Analytical Computer Science student with a deep expertise in Data Structures and Algorithms (DSA) and a strong grasp of efficient problem-solving. Skilled in building performance-oriented applications using the MERN stack, with a focus on code optimization and architectural integrity. A hackathon winner and competitive athlete, I bring a high level of discipline and logic-driven thinking to software development.

WORK EXPERIENCE

MERN Stack Trainee | Regex Software, Jaipur

- Completed intensive practical training on Full Stack development including React, Tailwind CSS, and JavaScript.
- Developed real-world project architectures and optimized frontend performance.

Full Stack Developer Intern | GeeksforGeeks Bootcamp

- Participated in a 6-week immersive program covering both frontend and backend integration.
- Mastered database management and API development.

Industrial Trainee | BKB IET Training Cell

- Completed 15-day hands-on training focusing on C, C++, and Python programming fundamentals.

* PROJECTS *

Swadeshi Travels (Travel Guidance Platform)

- Developed a comprehensive platform for travelers featuring budget planning and AI chatbot assistance.
- Integrated ticket booking systems and a 3D GPS preview for location exploration.

E-Commerce Platform

- Built a full-stack Amazon-like application using the MERN stack.
- Implemented product listings, dynamic shopping carts, and secure order management.

Banking Management System

- Designed a system to handle secure deposits, withdrawals, and transaction history using integrated databases.
